Roblox might have the veneer of a video game, but it's perhaps more accurate to describe it as a set of tools its users can wield to build their own video games (or "experiences" as the company sometimes refer to them), to be hosted on the Roblox platform. These creation tools are designed to be less daunting to the entry-level developer than professional game engines, and fully customisable frameworks exist across numerous genres. These include maze-runners, first-person shooters, tycoon simulators, and free-form "roleplay" genre, where developers create worlds – schools, cities, historical

When you enter any given Roblox world, the user does not assume control of a context-relevant character (think Sonic, Mario, or Lara Croft) but as your persistent, user-created avatar. A virtual You, effectively – whoever you've chosen to be. Add to that an attendant in-game economy which has sprung up to support this expression of identity, with all sorts of user-generated clothing, hairstyles, accessories and skins available to purchase in the platform's avatar shop. Roblox offers an opportunity, then, not just for play, but for digital-first designers and entrepreneurial retailers.
